Dear Sir/Madam,

**M4 Junction 15 (Swindon, Wiltshire) – Resurfacing**

I am writing to advise that Kier Highways, on behalf of Highways England, will be resurfacing sections of the roundabout at junction 15 to address surface defects (e.g. potholes and low skid resistance areas). This work is to ensure the network remains in a safe condition for our customers.

In order to carry out the work as efficiently and safely as possible, we'll need to close the eastern and western sides of the roundabout non-consecutively. We recognise that this is a busy junction, and therefore all work will be carried out overnight, between 10pm and 6am, when traffic flows are at their lowest.

<b>Closure</b>	East side of roundabout
<b>Dates</b>	Monday 30 and Tuesday 31 October 2017* Monday 6 and Tuesday 7 November 2017*
<b>Traffic management details</b>	Closure of the eastern side of the roundabout Closure of eastbound entry slip road Closure of westbound exit slip road Closure of A419 southbound from the Commonhead Roundabout to junction 15

<b>Closure</b>	West side of roundabout
<b>Dates</b>	Wednesday 1 and Thursday 2 November 2017* Wednesday 8 and Thursday 9 November 2017*
<b>Traffic management details</b>	Closure of the western side of the roundabout Closure of eastbound exit slip road Closure of westbound entry slip road Closure of A349 northbound approach to the roundabout

During the closures clearly signed diversions will be in place via the M4 junctions 14 and 16, Swindon, Royal Wootton Bassett, Lyneham, Calne and Marlborough (see map overleaf).
